# Complete Voice and Internet

Reduce your overheads with our all-in-one service. 8-60 channels of ISDN-quality voice and up to 20Mbps of public internet access (with the same download and upload speeds) over the same connection.

## Ideal for:

- Businesses requiring up to 60 channels of voice and 20Mbps of internet access
- Companies that have outgrown traditional solutions (ie. using separate lines for ISDN and internet)
- Organisations looking to improve control of their overheads
- Businesses with changing demands in voice capacity (e.g. seasonal variation)
- Companies wanting to make the first move to IP Voice (SIP) without having to change their ISDN phone system

## Easy move to IP Voice

We'll ensure a smooth transition onto our Next Generation Network through our high-quality installation support - delivering a simple single solution. Our experienced site engineers will manage the practical aspects on the day of migration making sure your switchover doesn't affect day-to-day business.

## Fully managed and adaptable

Includes setup, secure hardware and installation, compatible with ISDN and IP phone systems. We will deliver the very latest technology to provide a clear and flexible service, to support your evolving business requirements.

## Reliable and secure

Delivered over a secure, dedicated connection within our Next Generation Network, supported 24/7 by our UK-based agents. Our Business Grade SLA guarantees your service and your peace of mind.

## Flexible

Channel quantities can be flexed up or down on demand between 8 and 60 channels, allowing you to react to seasonal or changing demand.

## Driving value through consolidation

Increase efficiency and reduce overheads by delivering voice & Internet via a single connection.

## Business grade call features

Our ISDN-quality voice call features give you the option of presentation number; selective outgoing call barring options and business continuity by way of admin-controlled call diversion.

## Why TalkTalk Business?

Since 1993 TalkTalk Business has been dedicated to serving the needs of UK businesses of all types and sizes. Today we provide communications solutions to over 180,000 business and public sector customers. We deliver a full range of Business Grade offerings including Connectivity, Hosted Solutions, Next Generation Voice Solutions, Mobile, and IT Networking & Security.

With the largest Next Generation Network in the UK, purpose-designed and built with over £600 million of investment, we provide 94.5% coverage of UK businesses. And we're not stopping there – through monitoring and investing in our infrastructure we're still growing. With more than 600 UK-based skilled customer service professionals to support your business, you will receive support that you can really rely on, dedicated to serving the needs of UK businesses of all types and sizes.
