

EoFTTC

From TalkTalk Business

**TalkTalk
Business**

- 1 Customer site**
A range of symmetrical product speeds available, with easy upgrade routes allowing you to choose the best bandwidth speed for your company and future-proofing your business for growth needs. There is an option of a managed router if required.

- 2 Exchange connection**
The Ethernet line goes via the TalkTalk's Ethernet switch in the exchange.

- 3 Connect to the network**
The line is connected to TalkTalk's NGN allowing you to choose the circuit to be delivered either as an Internet Access circuit or as part of an MPLS IPVPN solution.
